# JET 2020+ Scheme

Aim high, for patients-The new era in Asian peripheral intervention field-

**JET: Japan Endovascular Treatment Conference** is the largest peripheral intervention live demonstration course in Asia. Over 2000 participants in multidisciplinary fields from around Japan and Asia. In the following three and a half days, 500 lectures will be prepared by global experts from 12 countries in various sessions, such as live demonstration, debate, educational session, nurse and techs session, presentation award, and partnership sessions. JET will collaborate with local and international conferences. JET offers opportunities to share advanced knowledge, devices, and techniques in peripheral intervention therapies and clinical research. We aim to keep the meetings highly educational to promote medical innovation and patient care.
